

Removing FACE PAINT

To remove your Face Paint safely please follow these guidelines.

1. DO NOT START BY USING WATER. Instead, mix a face friendly soap (liquid or bar) with a couple of drops of water. (Baby Soap is generally safe around the eye area).
2. Rub the soap, with your fingertips, into the paint. This will cause the paint to merge and become murky.
3. Wipe the Face Paint off with a damp paper towel, wet wipe, or makeup wipe. A damp cloth will also be fine however if you are concerned with possible staining use something disposable.
4. Rinse your face with warm water. If needed repeat steps 1 to 3 until all the paint is removed.
DO NOT USE ALCOHOL OR SCRUBS. Just gently rub the skin and remember it may take more than one attempt to remove it all.

Occasionally, you may find that some of the colours have left a slight staining behind. This is perfectly normal and will wear off on its own. However if you would like to remove it sooner, follow these steps:

1. Apply a small amount of gentle oil (not strongly fragranced) of your choice, e.g.: Coconut Oil, Jojoba Oil, Olive Oil etc, to the face with your fingertips, and rub gently into the area. *This is a great way to help with any paint remaining on the eyelids.*
2. Wipe clean with a wet wipe etc, and repeat if need be.
3. Finish by rinsing with warm water and dry.

We hope you enjoyed your Face Painting with **Young@Heart Face Painting** and remembered to take lots of wonderful photos. You can share your photos with us on Facebook or Instagram just search for **@YAH.FacePainting**
